Bare Shaft Pumps

Ultimate Pump Serviceability

Meet the bare shaft pumps

The **bare shaft** is the hydraulic core of a pump. This versatile solution is designed to be compatible with multiple pump model configurations, simplifying maintenance and streamlining inventory management. Its modularity allows you to maintain a single type of bare shaft in your inventory, simplifying stock management and reducing overhead.

A unique modular solution

Designed with simplicity and modularity at its core, the **bare shaft pump**'s unique design allows for easy installation and reduced repair times. With benefits such as increased uptime, reduced total cost of ownership, and ultimate serviceability, the bare shaft pump is a testament to Atlas Copco's commitment to innovation.

With **a single part number**, you'll have access to all these components*:

	Bare Shaft Pump
Casing	✓
Semi Open Impeller	✓
Closed Impeller	✓
Wear Plate	✓
Wear Ring	✓
Support	✓
Shaft	✓
Bearings	✓
Head	✓
Mechanical Seal	✓

*Components included depend on machine specifications.

Ultimate serviceability

1 Modular Design

The bare shaft pump's modular design makes it highly adaptable and versatile. Compatible with multiple pump model configurations, it easily replaces old parts, simplifying maintenance and reducing inventory needs. This leads to streamlined stock management and lower overhead costs.

2 Single Part Number

This unification simplifies stock management, reduces complexity, and lowers the costs associated with managing multiple part numbers. By standardizing on a single part number, the supply chain is streamlined, ensuring quick and easy access to replacement parts.

3 Serviceability

Bare shaft pumps are easy to install and integral to efficient maintenance strategies, facilitating swift and straightforward servicing. Their streamlined replacement process not only reduces downtime but also contributes to a lower total cost of ownership, optimizing operational continuity and efficiency.

4 Increased pump uptime

Bare shafts, with their simple and robust design, enhance overall pump performance and reliability. Replacing old bare shaft pumps with new ones contributes to increased uptime and extends the lifespan of the pump. Their ease of use makes replacement straightforward, ensuring minimal downtime and maintaining high customer satisfaction.
