The right people for the job

While our fleet is, if we say so ourselves, highly recognizable, we do want to put the women and men behind the scenes in the spotlight. From all the way back in the 19th century, when the foundations of Atlas Copco were laid, to today: it's people who make the difference. Skilled sales engineers and logistical support to highly qualified, trained and certified technicians.

Everyone at Atlas Copco Rental, no matter the department, is dedicated to making our collaboration as smooth as possible and ... memorable.

Contact us now:

www.atlascopcorental.com

The industry leader

We know you are not looking for specific equipment, but a resource that performs according to specific parameters. For short or long term demands, planned contingencies or emergencies, Atlas Copco Rental is available 24/7 to assist you and provide the most cost- and energy-efficient solutions that meet (and exceed) your expectations. Our fleet consists of state-of-the-art material that allows us to design solutions that will meet your specific needs. Quality of service, environmental care and the highest possible personnel safety are guaranteed. An industry first. **It's our business to keep your business running.**

Atlas Copco Rental division is triple ISO certified:
ISO 9001 - ISO 14001 - ISO 45001

What do we do

With Atlas Copco Rental, you never get “just the machines”. We pride ourselves in providing exceptional service, which means you get exactly what you want when you need it. Our team manages the entire process from start to finish. No matter its size. From single units to high-volume compressed air solutions.

EMERGENCIES 24/7

AGILE ASSET MANAGEMENT

PLANNED PROJECTS

SPECIALTY PROJECTS

“Because peace of mind, costs, and efficiency all matter.”

Modular flow solutions

- Construction
- General industry
- Fire prevention
- Drainage and wellpoint systems
- Service and maintenance
- Full turnkey projects including personnel
- Service and maintenance
- Accessories like pipelines, flow gauges, etc

Diesel or electric?

Spoiler alert: **there is no right or wrong answer.**

Through growing public concern for air quality and health, electric-driven equipment is receiving ever more attention. It not only eliminates harmful emissions, but also significantly reduces noise levels. Going electric does not mean sacrificing working parameters or expectations. **Electric-driven equipment is capable of reaching the same flow and pressure as its diesel-driven counterparts.**

Because electric-driven solutions are virtually plug-and-play, commissioning time is limited, and that in turn, increases efficiency.

However, a reliable source of energy is not always available. That is why Atlas Copco Rental continues to invest in our diesel-driven fleet and makes sure the equipment is efficient and compliant with the strictest legislation. Like Stage V, the new standard in diesel-driven equipment.

Self-priming centrifugal pumps

VAR Series – These pumps are used in applications with a quick self-priming capacity up to a suction lift of 7.5 m. The open impeller allows passage of solids with large diameter.

Vacuum assisted self priming pumps

PAS and WEL ECO – The vacuum assisted pumps use a vacuum pump to speed up priming, that is, the initial pumping stage where the air must be removed from the suction duct to allow the liquid to reach the pump.

Submersible pumps

Electric submersible pumps and accessories are designed for an extensive range of dewatering applications. These pumps feature a built-in starter and motor protection system, along with optional automatic level control. Adjustable wear-resistant rubber diffusers and hardened high-chrome impellers ensure durability in tough environments.

Piston pumps

The WEL range of self-priming, quick and automatic pumps is designed for high flow rate wellpoint applications. The high-performance WEL PST model is suitable for heavy-duty applications that require 24 hours of operation per day and is characterized by its maximum fuel efficiency.

Tank pump

Vacuum assisted electric pumps designed for the drainage of low-permeability soils (silt, silty-clayey), where the flow rates to be pumped are small, variable and with high air contents.

Accessories

- All sizes of pipeline for suction and discharge
- Flow gauges to measure the flow of fluid we manage
- Control Panel
- Cables
- Excavator
- Trencher machines
- Etc.

**“We offer more than just pumps.
We deliver flow solutions.
Perfectly adapted to your
operational requirements.”**

Fleet

While we focus on “total solutions”, rather than individual units, we do want to share the necessary details of our fleet. We match industry specific rental demands with the equipment and the right accessories to your exact application. Whether for straightforward use or complex projects, small and large: [call Atlas Copco Rental](#).

“Atlas Copco Rental
has a future-proof
fleet available today.”

“Temporary flow solutions for short- or long-term applications. Expertise and accessories always included.”
