

## WHICH ONE IS THE BEST?

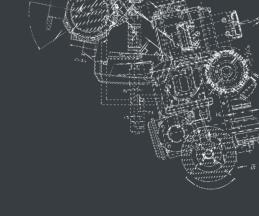

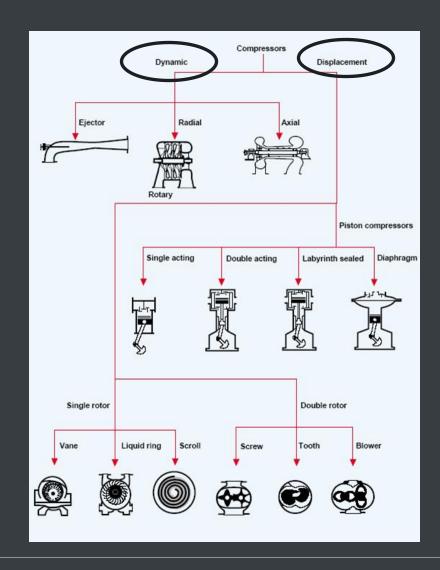

## Compressor type

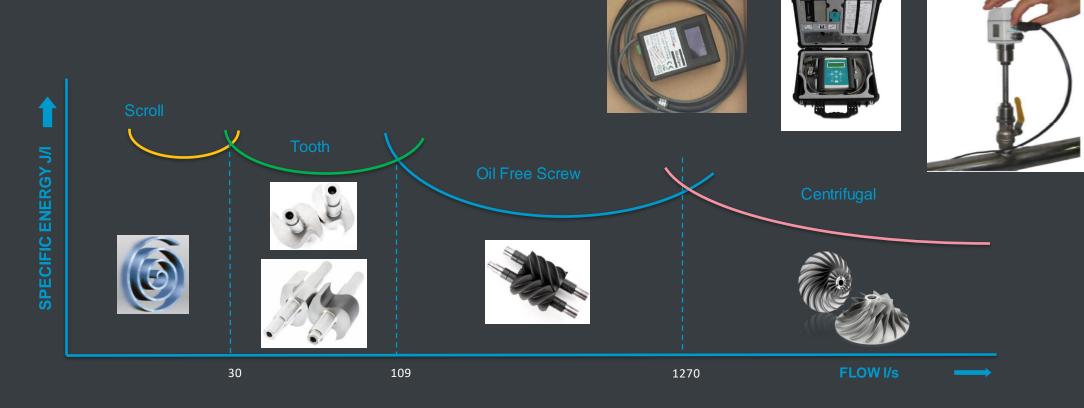

## Atlas copco compressor portfolio

Every Technology has an optimum performance curve.

Atlas Copco always offers the most efficient and reliable designs at all Optimal output capacities

## ZH+

#### Oil Free Centrifugal Compressor

#### **Key Features**

- 1. Certified 100% Oil-Free Air
- 2. Integrate design Plug & Play
- 3. Canopy for low noise
- 4. Dual offer
- 5. High efficiency with core design
- 6. Demister with Fan
- 7. Motorized IGV and BOV
- 8. Reliability with SS coolers

#### **Pressure Range**

4 -13 Bar

58-189 PSI

#### Volume Range

1,333 -20,000 L/S 2,825 – 42,377 cfm

4,800-72,000 m<sup>3</sup>h

#### Sound Level

73-85 dBA

#### **Cooling Method**

Water Cooled

#### **Unit Control Type**

Inlet Guide Vane Constant Pressure control Auto dual control

### ZR-ZT VSD+

#### Oil Free Screw Compressor

#### **Key Features**

- 1. Certified 100% Oil-Free Air
- 2. Class Leading Efficiency
- 3. Compact & Sophisticated design → Best efficiency, reliability, durability, performance and energy savings on the market
- 4. Low Noise Level
- 5. Permanent Magnet Motor, IP66 rating, class H insulation, Long lasting helical gears (AGMA 2015 A5)

#### **Pressure Range**

4 -10.4 Bar 60– 150 PSI

#### Volume Range

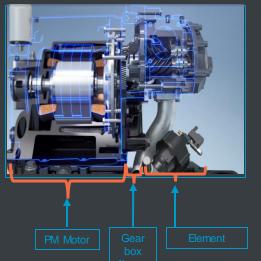

78 - 452 l/s 165-958 cfm 281-1627 m³/hr

#### **Sound Level**

66-80 dBA

#### **Cooling Method**

Air Cooled Water Cooled

#### **Unit Control Type**

Variable Speed Drive

**Energy Efficiency** 

Best

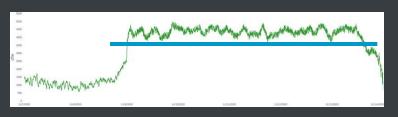

## Unique total solutions

Combining multiple compressor, dryer, energy recovery system, and control technologies

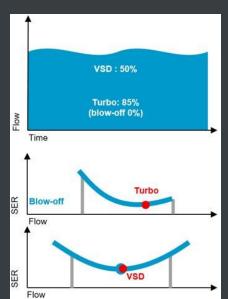

Combining the most efficient technologies to maximize efficiency and energy saving

Atlas Copco is in a unique position to offer

**TECHNOLOGY THAT'S BETTER TOGETHER**
