**Test certificate
Validation according ISO 8573-1: 2010 Part 1:
Contaminants and purity classes, AIRnet Piping**

Tests regarding the contribution of the AIRnet piping to the vapor content in compressed air according to ISO 12500-2 were witnessed.

Witnessed tests have shown that the quality of the compressed air after a set-up made out of the complete range of Airnet components can be considered as

Class 0 according to ISO 8573-1:2010

measured according to ISO 8573-5:2001 if the intake air fulfills these requirements as well.

This certificate is only valid for the single components which are specified in annex 1
