

EBB26

Atlas Copco

Made for people to make more.

The EBB26 is a drill designed to enhance its users. A drill engineered to enable operators to move faster, make fewer errors, perform better and ultimately achieve more.

BOOSTING OPERATOR PRODUCTIVITY IN DRILLING

In airframe assembly, 35% of holes are drilled using handheld tools. Yet, handheld drilling accounts for up to 65% of assembly cost, 85% of quality issues, and 80% of lost time due to injury.*

There's an opportunity to improve efficiency and increase total aerospace output by addressing the root cause of this problem: the productivity of aerospace operators.

To do this, we need to look at human productivity in a new light. Instead of rejecting or attempting to eliminate the human factor, we need to embrace it. That's why we created the EBB26 – a drill designed to enhance its users. Made for people to make more.

* Aerospace industry expert

GOING ELECTRIC

The EBB26 is our first electric handheld drill. It is designed to transform assembly line flow. It is engineered to enable operators to move faster, make fewer errors, perform better and ultimately achieve more.

DESIGNED TO IMPROVE

**OPERATOR
MOBILITY**

Let operators spend more time drilling.

**OPERATOR
ACCURACY**

Enable operators to make fewer mistakes.

**OPERATOR
PERFORMANCE**

Empower operators to do more with less.

EBB26

Features

CHUCK

MODULAR

OPERATOR MOBILITY

**CORDLESS &
BATTERY-DRIVEN**

**ONE TOOL,
MULTIPLE SPEEDS**

**SMALL SIZE &
SHORT HANDLE**

OPERATOR ACCURACY

**CONSTANT SPEED
& 2-STEP TRIGGER**

CUTTER USAGE

**A MORE PRECISE
CHUCK**

OPERATOR PERFORMANCE

LIGHTWEIGHT

REDUCED NOISE

**TOOL OPTIMIZED
FOR DRILLING**

Comparison table

	Model	Front part	Number of programs	Progressive trigger	2-step trigger	Cutter cycle counter	Wi-Fi tethering	Service interval monitoring	Order number
STANDARD	EBB26-055	Chuck	5	●		●			8432 0000 00
	EBB26-055-U	Threaded shaft	5	●		●			8432 0000 10
